We are seeking proposals which demonstrate the use of assessment to improve student learning or drive institutional initiatives. Each proposal should demonstrate the impact of assessment on higher education.

Special consideration given to proposals which fit the conference theme, particularly those focusing on overcoming assessment challenges; other proposal ideas of interest include panel discussions with cross college collaboration, HLC Assessment Academy or IUPUI presentations, closing equity gaps, co-curricular, gaining faculty buy-in, assessment for transfer, and forms of indirect assessment.

Proposals should be 50 minutes in length and can be styled as a presentation, workshop or panel discussion.
Graduate candidates welcome!
